Introduction

This international conference will be organised by IWW Water Centre (DE), RSC (UK) and SCI (UK). A scientific poster session and an exhibition related to the topics of the conference will be included. It is expected that more than 200 attendees from all over Europe will take part. You will have the opportunity to talk to decision makers from water companies and regulators. The relevant scientific community will also be present..

Programme Themes

- Emerging disinfection by-products
- Water treatment including advanced treatment processes
- Water recycling
- Online and laboratory-based monitoring
- Health and toxicology aspects of DBP
- DBP regulations and the future

Call for Papers

The programme will comprise six keynote speakers, and more than twenty speakers by invitation and from the call for oral papers. The call for papers is now open and papers will be considered for inclusion by the Programme Committee. Closing dates are:

30th June for oral abstracts

19th September for poster abstracts

Who should attend

This conference is aimed at water companies, public health professionals, drinking water quality regulators, suppliers of laboratory and on-line monitoring equipment, analytical chemists, and academic and industry researchers working in the area of disinfection by-products.

Registration Fees

450€ Member of the RSC, SCI or IWW

495€ Non-member

250€ Post-doctoral research assistant

150€ Post-graduate and undergraduate student

Late fees will apply to payments received after 31st August. To be notified when registration opens, please register your interest with the secretariat.
