

# Extreme-Throughput, Comprehensive Gas and Headspace Analysis: Automated SIFT-MS

Very high-throughput headspace and gas analysis provides unique opportunities for both contract and R&D laboratories serving a range of industries, from material emissions testing to environmental analysis to food and pharma testing.

**Syft Technologies** and **Gerstel** invite you to attend a one-day workshop showcasing revolutionary automated SIFT-MS.

## March 29, 2017

9.30 to 14.30 | fully catered

Gerstel GmbH & Co. KG  
Eberhard-Gerstel-Platz 1  
45473 Mülheim an der Ruhr  
Germany

by March 17, 2017

### Programme

Introduction to Selected Ion Flow Tube Mass Spectrometry (SIFT-MS)

SIFT-MS applications: from food to pharma to the environment

Gerstel automation solutions

High-throughput sample analysis with automated SIFT-MS

Live automation demonstrations
